

Bhuvvaan Punukolu

(720) 334 3174 | bhuvvaan@gmail.com | linkedin.com/in/bhuvvaan-chandra/ | github.com/bhuvvaan | bhuvvaan.github.io

PROFESSIONAL SUMMARY

Data Scientist with 4+ years of experience with expertise in model development (clustering, decision trees), ETL optimization, and cross functional collaboration using Python, SQL, R, and GCP. Proven success in deploying predictive analytics.

EDUCATION

University of Colorado Boulder

Master of Science, Data Science | GPA 4.0/4.0

Aug 2023 - May 2025

- **Relevant Coursework:** Machine Learning (Decision Trees, Neural Networks), Statistical Modeling, Data Mining, Big Data Engineering (Spark, GCP).

Indian Institute of Technology Madras

Bachelor of Technology, Aerospace Engineering

Aug 2013 - Jul 2017

TECHNICAL SKILLS

Languages: Python (PyTorch, Keras, Scikit-learn), SQL, SAS, R, PySpark, HiveQL, Hive

Tools: Google Cloud Platform, BigQuery, Docker, Kubernetes, Databricks, Git, Linux, Tableau, Hadoop, Azure

Methods: ETL, Data Governance, Root Cause Analysis, Statistical Modeling, Agile Methodologies, Time Series Analysis

PROFESSIONAL EXPERIENCE

Hartree Partners LP (Oaktree Capital) | Power Equity Analyst Intern | New York, NY

Jun 2024 - Aug 2024

\$10 Billion commodities trading fund.

- **Predictive Analytics:** Modeled financial performance of 100+ U.S. power assets using real-time data, generating investment signals that improved EBITDA forecasting accuracy by **20%**. *(R)*
- **Real-Time BI Solutions:** Developed a full-stack web app (APIs, Kubernetes) for real-time asset health monitoring, enabling traders to **optimize portfolio decisions**. *(JavaScript, HTML, CSS, Python)*
- **Market Insights:** Analyzed market-implied heat rates across 3 ISOs, uncovering load-temperature dependencies to guide long-term trading strategies. *(R)*

Flipkart E-Commerce (Walmart Group) | Data Scientist | Bangalore, India

Jul 2021 - Sep 2023

India's largest e-commerce platform (\$40B valuation)

- **Product Development:** Developed and patented a framework for tracking competitor price wars, collaborating with business and engineering teams to productionize the solution, preventing over **\$500K in annual revenue loss**. *(SQL, Python)*
- **Model Development & Validation:** Built a product categorization framework (MSKU) using machine learning (clustering, decision trees) and product attributes to identify 1,000+ replaceable SKUs, enhancing competitive intelligence and reducing redundant inventory costs by **15%**. *(Team Project) (SQL, Python)*
- **Pricing Strategy:** Spearheaded pricing strategy for 30% of platform products by identifying Key Value Items (KVIs) through traffic and elasticity analysis, directly influencing **\$3.5M+ in GMV** (Gross Monetary Value) contribution. *(SQL, Python)*
- **Experimentation:** Developed a sensitivity analysis metric linking price changes to GMV shifts, identifying an **8%** product portfolio where lower prices drove higher GMV, leading to optimized pricing and increased revenue. *(SQL, Python)*
- **Dashboard Development:** Revamped data pipelines and Power BI dashboards, delivering weekly insights to senior leadership and 200+ stakeholders to drive category-wide decisions. *(Power BI, Azure)*
- **Agile Collaboration:** Awarded Ace Alliance for the output produced and inter-team collaboration within a team of 25 people on increasing market share and converting low propensity customers, which led to a **\$400K increase in GMV** per day.

Sandlogic Technologies | Data Analyst | Bangalore, India

Aug 2018 - Jun 2020

Deep-tech AI company delivering enterprise solutions

- **Client Onboarding Support:** Worked with enterprise clients across sectors (e.g., telecom, edtech, banking) to prepare and clean data for onboarding onto Sandlogic's AI products, ensuring format compatibility and basic validation before ingestion.
- **Data Reporting & Analysis:** Created dashboards and reports using Excel, Power BI, and SQL to track onboarding progress, identify data quality issues, and highlight usage patterns during early deployment stages.
- **Data Scripting:** Used Python (pandas) and SQL queries to automate repetitive tasks like data formatting and generating summary statistics to support internal teams during client rollout phases.

RESEARCH PROJECT

Multi-Agent Human Robot Collaboration | HIRO Lab

Aug 2024 – May 2025

- Designed a custom **diffusion model** to generate an optimized automatic warehouse layout, improved throughput by **15%**.
- Used multi-agent reinforcement learning techniques to track the efficiency of different warehouse organization layouts.
- Developed RL environments with **Stable Diffusion** to enhance human-robot collaboration in assembly line.
